Mr. Sumanth is a commerce graduate with a PGDM in IT & Operations. He has served for Myntra, Suzlon and Wipro.

At present he holds the position of Supply Chain Management Analyst at Oracle. His areas of expertise include, supply chain management, quality management, lean management and material management. He is currently pursuing doctoral degree in IT.

The session included an overview about quality and quality management system and its role in enhancing productivity.

He started with the introduction to quality and continued with an insight in to the 7 tools of quality, the significance of process, process flow, measurement of processes, and approaches to quality and the significance of technology in enhancing quality.

While elaborating on approaches to quality, he dwelled upon the ways and means of identifying problem areas, analyzing gaps, using the appropriate techniques to bridge the gap, usage of the appropriate measurement tool and aim at sustainable growth.

He explained in detail the various application techniques such as VSM, SPSS, Minitab, Project Management Tools, ERP solutions and Analytics which plays a vital role in the present day's quality deliverables.

As consumers are more quality conscious and they would still be more quality conscious in future, it is mandatory for organizations to contemplate on quality issues and make their business more sustainable.
